The guidance provided above are forward-looking statements and actual results may differ materially. Refer to the "Forward-Looking Statements" safe harbor section below for information on the factors that could cause our actual results to differ materially from these forward-looking statements.

¹ Remaining performance obligations represent all contracted future revenue that has not yet been recognized, including both deferred revenue and non-cancelable contracted amounts that will be invoiced and recognized as revenue in future periods.

Non-GAAP operating income (loss), non-GAAP operating margin, non-GAAP net income (loss), and non-GAAP net income (loss) per share are non-GAAP financial measures. Additional information on Qualtrics' reported results, including a reconciliation of the non-GAAP financial measures to their most comparable GAAP measures, is included in the financial tables below. A reconciliation of non-GAAP guidance measures to corresponding GAAP measures is not available on a forward-looking basis without unreasonable effort due to the uncertainty of expenses that may be incurred in the future, although it is important to note that these factors could be material to Qualtrics' results computed in accordance with GAAP.

Non-GAAP Financial Measures

To supplement our financial results, which are prepared and presented in accordance with GAAP, we use certain non-GAAP financial measures, as described below, to understand and evaluate our core operating performance. These non-GAAP financial measures, which may be different than similarly-titled measures used by other companies, are presented to enhance investors' overall understanding of our financial performance and should not be considered a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP.

We believe that these non-GAAP financial measures provide useful information about our financial performance, enhance the overall understanding of our past performance and future prospects, and allow for greater transparency with respect to important metrics used by our management for financial and operational decision-making. We are presenting these non-GAAP measures to assist investors in seeing our financial performance using a management view, and because we believe that these measures provide an additional tool for investors to use in comparing our core financial performance over multiple periods with other companies in our industry. You should consider non-GAAP results alongside other financial performance measures and results presented in accordance with GAAP. In addition, in evaluating non-GAAP results, you should be aware that in the future we will incur expenses such as those that are the subject of adjustments in deriving non-GAAP results and you should not infer from our non-GAAP results that our future results will not be affected by these expenses or any unusual or non-recurring items.

Non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating income (loss), non-GAAP operating margin, non-GAAP net income (loss), non-GAAP net income (loss) per share, free cash flow, free cash flow margin: We define these non-GAAP financial measures as the respective GAAP measures, excluding equity and cash settled stock-based compensation expenses, amortization of acquired intangible assets, and the tax impact of the non-GAAP adjustments. When evaluating the performance of our business and making operating plans, we do not consider these items (for example, when considering the impact of equity award grants, we place a greater emphasis on overall stockholder dilution rather than the accounting charges associated with such grants). We believe it is useful to exclude these expenses in order to better understand the long-term performance of our core business and to facilitate comparison of our results to those of peer companies and over multiple periods.

We calculate free cash flow as net cash provided by operating activities less capital expenditures. Free cash flow margin is calculated as free cash flow divided by total revenue. We incurred significant cash outflows in connection with the settlement of liability-classified, stock-based awards in accordance with SAP's employee equity compensation programs. Our free cash flow for the three months ended March 31, 2021 and 2020 includes \$72.0 million and \$98.3 million, respectively, in cash outflows related to the settlement of liability-classified, stock-based awards.

⁽¹⁾ Our stock-based compensation expense reflects the recognition of both equity-classified awards and liability-classified awards. Liability-classified awards are settled in cash in accordance with SAP's employee equity compensation programs. Liability-classified awards are recorded according to mark-to-market accounting. On January 28, 2021, the Company completed a voluntary exchange offer pursuant to which 5.4 million cash-settled legacy RSAs, RSUs, and options (Qualtrics Rights) and 1.3 million cash-settled SAP restricted stock unit (RSU) awards were exchanged into 12.8 million equity-settled Qualtrics RSU awards, representing 93% of the outstanding Qualtrics Rights and SAP RSU awards.
